Hosted SharePoint

Only £20 per month

SharePoint 2010

Hosted SharePoint 2010

Hosted SharePoint is the ideal document management tool, helping you to manage your organisation better. It enables your team to work faster and smarter through collaboration and efficient document sharing. With its familiar interface and seamless connection to Microsoft Office you can work comfortably and confidently. Your employees are able to share ideas and expertise, help design solutions for specific needs and find the right information to make better decisions.

Hosted SharePoint 2010 dramatically increases employee productivity. It allows you to combine your portal, document management and collaboration tools into one hosted application. Collaboration is made possible between employees on documents even when those users are not based in the same location. Non-technical staff can easily customise SharePoint and install, move and remove modules to increase performance.

You can experience the benefits of high-end software without the drawbacks of high-end cost. By using Hosted SharePoint, training, hardware and maintenance costs are reduced and IT staff have more time to really focus on increasing productivity and usuability.

Only £20 per month
