

# Hosted Voice & VoIP

From £14 per month

## Enterprise Hosted VoIP

Relocating onto one of our V-Cloud VoIP phone systems can save you money on calls, improve communication throughout your business and enhance customer service with intelligent IVRs and intelligent switchboards. You get all the benefits of VoIP technology without having to deploy or maintain expensive servers or PBX switchboards and we provide 100% network uptime. Our VoIP phone systems are 'carrier agnostic', meaning your calls are routed via the cheapest provider at any one time, saving you over 20% on your phone bill. With no expensive contracts or additional costs for extra functionality, you can migrate across to our platform with ease. Order one of our VoIP phone systems now and have a fully functioning, sophisticated telephone service within minutes, without the need for a BT phone line.

### LINE ONLY PACKAGES:

Hosted VoIP Lines are also available without the phone included. If you require a customised package without any hardware or monthly contracts, then Commensus provide a simple pricing matrix starting from £3 line/month.
