Zebra Z-Select 2000D 38mm x 25mm Premium topcoated direct thermal paper label with permanent adhesive

A white smooth coated direct thermal label stock that produces black visible light images at speeds of up to 152 mm per second on all Zebra industrial and desktop printers. The ultra-removable rubber-based adhesive provides excellent tack for most packaging and plastic and metal surfaces and allows for clean removal. Zebra's Direct Thermal labels are available in paper and synthetic formats. Paper offers an inexpensive way to print in a variety of general-purpose applications, while synthetic offers more durable, long-lasting results with resistance to abrasion, moisture, and chemicals. Direct thermal technology ds not require a ribbon. Instead, a chemically coated heat-sensitive material produces images as heat is applied to the surface. Ideal for indoor applications where temperatures will not exceed high levels.
