**Apple iMac All-in-One PC Core 2 Duo 2.26GHz
2GB 160GB 20 inch WSXGA TFT DVD-RW (-R DL)
LAN WLAN Bluetooth Mac OS X v10.6 (NVIDIA
GeForce 9400M)**

From any view, iMac is impressive. But little compares to sitting in front of the glossy widescreen display framed in amazingly slim anodized aluminum. iMac instantly turns your workspace from a cluttered desktop into a brilliant display podium. iMac sets the standard for elegance and power. It packs a complete, high-performance computer into its all-in-one design. With an anodized aluminum frame and glass cover, its striking to behold. And these materials are highly recyclable, so iMac is friendlier to the environment. The 20- and 24-inch glossy widescreen displays make photos and movies come alive with rich colour. Photos, movies, games, videos, and applications with palettes. Anything you see on the 20- or 24-inch glossy widescreen display will be a pixel-perfect experience. iMac features a flat-panel LCD screen with 1680-by-1050 resolution (20-inch). Turn your house into a Wi-Fi wonderland. High-speed 802.11n wireless technology is built into iMac. And with Time Capsule or the AirPort Express Base Station, every computer in every room can wirelessly connect to iMac, the Internet, and each other.³ Over this network, everyone can print, surf the web, and even play music from the iTunes library through your home stereo wirelessly.

The ultrathin, sleek, and compact Apple Keyboard perfectly complements iMac. Its anodized aluminum enclosure features low-profile keys with a crisp, responsive feel. The keyboard includes special function keys for one-touch control of Mac features, and two USB 2.0 ports provide high-speed connectivity to your iPod, Mighty Mouse, digital camera, and other devices. With iMac, details make all the difference. For example, because its made from a single sheet of aluminum, you wont see any seams or screws except for a single compartment on the bottom that provides easy access to the memory slots. The built-in iSight camera and microphone are integrated so neatly you barely notice theyre there until you need them for a video chat. The 20-inch iMac with the NVIDIA GeForce 9400M integrated graphics processor delivers up to 2.3x faster graphics performance. iMac doesnt have a disc tray. CDs and DVDs slide right into the slot-loading SuperDrive.

Warranty	90 days of free telephone support and a one-year limited warranty.

About Memory Express

Although we started out selling just Memory the best part of fifteen years ago, we have diversified organically over the years at the request of our customers. We specialise in Networking, Storage and Disaster Recovery and have the knowledge, experience and strategic partnerships to provide you with the service and value you demand - quality products, reasonably priced and delivered on time.

Memory Express can offer you a full range of installation and configuration services for hardware and software as well as detailed, accurate advice on all aspects of your IT projects. You'll be glad to know that we don't have a room full of school leavers trying to sell products they don't understand - all our staff are seasoned IT specialists and have an average length of service of over ten years. We won't just push you towards the solution we feel like selling; we'll help you to find the one you need.

Meanwhile, online, we offer one of the largest product ranges of any UK IT supplier. Showing near live stock, in depth product information and keen pricing, we're sure you'll find what you need. We also have matched memory upgrades for over 50,000 models of computer, server, printer, phone and camera, guaranteeing you the right memory, first time. All this is backed up by the same great service you'd expect when dealing with us over the phone. For our regular business customers, we provide T3, our corporate purchasing portal which provides a truly corporate focused buying experience.

We're conveniently located in Park Royal, London's Technology Business Park, allowing us to reach all areas of the UK quickly and efficiently. Many of our City based corporate clients benefit from same day delivery and we can offer next day delivery to established customers throughout the British Isles. Online delivery tracking and status information means that you need not worry about the whereabouts of your order.

We're proud to have built up a wide variety of partnerships with quality vendors and many of our staff hold certifications from top tier manufacturers including Microsoft, Acronis, Symantec and VMWare.

Our clients vary in size from SMEs to many of the UK's largest corporates, government departments, schools and universities, and we're pleased to say that most have been our customers for many, many years - we believe in long term business relationships, not turning a quick profit. Why not contact us now to see how we can help you get the quality of service they already enjoy?
