IBM Tivoli Identity Manager Application Edition User Value Unit Annual Software Maintenance Renewal

IBM **Tivoli** software

IBM Tivoli Identity Manager is an automated, and policy-based solution that manages user access across IT environments. Through the use of roles, accounts, and access permissions, it helps automate the creation, modification, and termination of user privileges throughout the entire user lifecycle. IBM Tivoli Identity Manager can help increase user efficiency, reduce IT administration costs, enforce security, and manage compliance. It does this with centralized user self-service, delegated administration, automated approvals processing, periodic revalidation of user access rights, and documentation of controls. The introduction of operational role management functionality into IBM Tivoli Identity Manager V5.1 helps you bridge the gap between how business users view their IT resources and the actual IT implementation of user access rights. This allows you to simplify and reduce the cost administering user access rights, offers you a set of additional controls to manage internal security, and enables you to scale existing user provisioning deployments across the enterprise. Tivoli Identity Manager provides automated audit readiness with fine-grained access rights recertification, additional prebuilt reports, a custom report builder, direct auditor access to reports, and mapping of low-level IT entitlements into business-friendly descriptions of what a user can actually do with access.

User Value Unit (UVU) is a unit of measure by which the program can be licensed. UVU Proofs of Entitlement (PoEs) are based on the number and type of users for the given program. Licensee must obtain sufficient entitlements for the number of UVUs required for licensee's environment as specified in the table below. The UVU entitlements are specific to the program and type of user and may not be exchanged, interchanged, or aggregated with UVU entitlements of another program or type of user. The users for the purposes of UVU calculation are the sum of all internal users, external users, and infrequent users given access to the program.

Features

- * A highly customizable self-service user interface that can be easily modified to match intranet and extranet portal look and feel
- * A mapping of low-level IT entitlements into business-friendly descriptions of what users can actually do with their access
- * Password self-service reset to help improve user productivity and reduce help desk costs
- * Access request management that delivers a quick-start option to streamline user provisioning and offers users the opportunity to manage their role membership, access rights, passwords, personal information, and approval tasks
- * A dynamic policy management engine that automates user provisioning and aids in compliance efforts
- * Access rights reconciliation, recertification, and reporting to address audit requirements
- * Broad support for system adaptors to accelerate installation of new applications

About Memory Express

Although we started out selling just Memory the best part of fifteen years ago, we have diversified organically over the years at the request of our customers. We specialise in Networking, Storage and Disaster Recovery and have the knowledge, experience and strategic partnerships to provide you with the service and value you demand - quality products, reasonably priced and delivered on time.

Memory Express can offer you a full range of installation and configuration services for hardware and software as well as detailed, accurate advice on all aspects of your IT projects. You'll be glad to know that we don't have a room full of school leavers trying to sell products they don't understand - all our staff are seasoned IT specialists and have an average length of service of over ten years. We won't just push you towards the solution we feel like selling; we'll help you to find the one you need.

Meanwhile, online, we offer one of the largest product ranges of any UK IT supplier. Showing near live stock, in depth product information and keen pricing, we're sure you'll find what you need. We also have matched memory upgrades for over 50,000 models of computer, server, printer, phone and camera, guaranteeing you the right memory, first time. All this is backed up by the same great service you'd expect when dealing with us over the phone. For our regular business customers, we provide T3, our corporate purchasing portal which provides a truly corporate focused buying experience.

We're conveniently located in Park Royal, London's Technology Business Park, allowing us to reach all areas of the UK quickly and efficiently. Many of our City based corporate clients benefit from same day delivery and we can offer next day delivery to established customers throughout the British Isles. Online delivery tracking and status information means that you need not worry about the whereabouts of your order.

We're proud to have built up a wide variety of partnerships with quality vendors and many of our staff hold certifications from top tier manufacturers including Microsoft, Acronis, Symantec and VMWare.

Our clients vary in size from SMEs to many of the UK's largest corporates, government departments, schools and universities, and we're pleased to say that most have been our customers for many, many years - we believe in long term business relationships, not turning a quick profit. Why not contact us now to see how we can help you get the quality of service they already enjoy?
