IBM Tivoli Storage Manager Extended Edition Client Devices 12 Months Software Subscription and Support Reinstatement

Tivoli Storage Manager Extended Edition is enhanced storage management software that expedites disaster recovery. It expands Tivoli Storage Manager unified recovery management, providing you with exceptional scalability, performance and reliability plus advanced disaster recovery capabilities. Performs high-performance, scalable backups and restores that minimize network traffic and transfer data efficiently and on a schedule and provides functionality to track offsite storage. Automated, scheduled asynchronous replication of the client backup data and descriptive metadata to an off-site Tivoli Storage Manager Server for 'hot standby' disaster recovery. Automatically generates and dynamically updates a step-by-step disaster recovery plan, including automated scripts, based on the current configuration of the IT infrastructure. Provides data protection and disaster recovery functionality for more than 500 different tape and virtual tape storage devices from more than a dozen vendors with no limitations on the number of drives or slots. Offers network attached storage backups with Network Data Management Protocol (NDMP), a protocol that the Extended Edition storage management software uses to control communications between clients, servers and storage devices.

A client device is a computing device that requests the execution of a set of commands, procedures, or applications from another computer system that is typically referred to as a server. Multiple client devices may share access to a common server. A client device generally has some processing capability or is programmable to allow a user to do work. Examples include, but are not limited to, notebook computers, desktop computers, desk side computers, technical workstations, appliances, automated teller machines, point-of-sale terminals, tills and cash registers, and kiosks.

Features

*** Enables multiple Tivoli Storage Manager servers to share the same data tape library for improved data centralization and asset utilization**

*** Supports both full and differential file-system image backups and both full and file-level restores**

*** Help simplify the protection and management of your data, even as it continues to grow exponentially**

*** Address business continuity by helping to shorten backup and recovery times and helping to maximize application availability with advanced data recovery management technologies**

*** Employ data de-duplication and a hierarchy of storage to help increase efficiencies and conserve resources**

*** Help enhance data security with innovative access and encryption features**

*** Help adapt to changes within the IT infrastructure to minimize service disruptions and speed restorations and backups**

IBM Tivoli Storage Manager Extended Edition Client Devices 12 Months Software Subscription and Support Reinstatement

∗ Help control storage management costs with ease-of-use features and integration with IBM network attached storage (NAS) products

∗ Increase visibility into the data protection environment by providing advanced features for operational monitoring and historical reporting

∗ 12 Months Software Subscription and Support Reinstatement

Specification

General

Tivoli Storage Manager Extended Edition is enhanced storage management software that expedites disaster recovery. It expands Tivoli Storage Manager unified recovery management, providing you with exceptional scalability, performance and reliability plus advanced disaster recovery capabilities. Performs high-performance, scalable backups and restores that minimize network traffic and transfer data efficiently and on a schedule and provides functionality to track offsite storage. Automated, scheduled asynchronous replication of the client backup data and descriptive metadata to an off-site Tivoli Storage Manager Server for 'hot standby' disaster recovery. Automatically generates and dynamically updates a step-by-step disaster recovery plan, including automated scripts, based on the current configuration of the IT infrastructure. Provides data protection and disaster recovery functionality for more than 500 different tape and virtual tape storage devices from more than a dozen vendors with no limitations on the number of drives or slots. Offers network attached storage backups with Network Data Management Protocol (NDMP), a protocol that the Extended Edition storage management software uses to control communications between clients, servers and storage devices.

Information

A client device is a computing device that requests the execution of a set of commands, procedures, or applications from another computer system that is typically referred to as a server. Multiple client devices may share access to a common server. A client device generally has some processing capability or is programmable to allow a user to do work. Examples include, but are not limited to, notebook computers, desktop computers, desk side computers, technical workstations, appliances, automated teller machines, point-of-sale terminals, tills and cash registers, and kiosks.

About Memory Express

Although we started out selling just Memory the best part of fifteen years ago, we have diversified organically over the years at the request of our customers. We specialise in Networking, Storage and Disaster Recovery and have the knowledge, experience and strategic partnerships to provide you with the service and value you demand - quality products, reasonably priced and delivered on time.

Memory Express can offer you a full range of installation and configuration services for hardware and software as well as detailed, accurate advice on all aspects of your IT projects. You'll be glad to know that we don't have a room full of school leavers trying to sell products they don't understand - all our staff are seasoned IT specialists and have an average length of service of over ten years. We won't just push you towards the solution we feel like selling; we'll help you to find the one you need.

Meanwhile, online, we offer one of the largest product ranges of any UK IT supplier. Showing near live stock, in depth product information and keen pricing, we're sure you'll find what you need. We also have matched memory upgrades for over 50,000 models of computer, server, printer, phone and camera, guaranteeing you the right memory, first time. All this is backed up by the same great service you'd expect when dealing with us over the phone. For our regular business customers, we provide T3, our corporate purchasing portal which provides a truly corporate focused buying experience.

We're conveniently located in Park Royal, London's Technology Business Park, allowing us to reach all areas of the UK quickly and efficiently. Many of our City based corporate clients benefit from same day delivery and we can offer next day delivery to established customers throughout the British Isles. Online delivery tracking and status information means that you need not worry about the whereabouts of your order.

We're proud to have built up a wide variety of partnerships with quality vendors and many of our staff hold certifications from top tier manufacturers including Microsoft, Acronis, Symantec and VMWare.

Our clients vary in size from SMEs to many of the UK's largest corporates, government departments, schools and universities, and we're pleased to say that most have been our customers for many, many years - we believe in long term business relationships, not turning a quick profit. Why not contact us now to see how we can help you get the quality of service they already enjoy?
