IBM Tivoli Access Manager for e-business V6.1 is a versatile application security solution that provides flexible authentication and a centralized authorization for Web access management. Primarily focused on Web applications, Tivoli Access Manager for e-business implementations vary from simple Web single sign-on (SSO) to more highly scalable application security infrastructure deployments. Tivoli Access Manager for e-business can help you manage compliance, growth, and complexity of new application deployments while helping control escalating management costs of securing large number of Web applications across the enterprise. Furthermore, Tivoli Access Manager for e-business helps you address the difficulties of implementing consistent security policies across a wide range of Web and application resources. It works by centrally managing access control policy for numerous enforcement points that can be placed as a proxy in front of Web applications, or through authorization and authentication plug-ins directly into a Web or application-server environment. For authorized users, Tivoli Access Manager for e-business integrates with Web applications and servers to deliver a secured and unified business experience. It helps you secure access to business-critical applications and data spread across the extended enterprise, allowing highly available, scalable transactions with business partners, customers, suppliers, and employees.

IBM Tivoli Access Manager for e-business V6.1 is an essential application security solution providing authentication and authorization service to address real-time application security needs and offering Web SSO and static entitlement management for Web application resources. In the IBM Tivoli security portfolio, Tivoli Access Manager for e-business fulfills the role of user-access control and run-time enforcement - the central point of authentication of the user, and enforcement of resource access control policy. This can be contrasted with Tivoli Identity Manager, which focuses on user provisioning through the management of user identities and passwords in a closed-loop, workflow-based solution. Tivoli Access Manager for e-business primarily focuses on solving the problem of managing user access control to heterogeneous Web applications across the enterprise. While Web solutions such as application servers, content managers, and ERP systems have their own disparate security systems, larger Web implementations can externalize these security operations to Tivoli Access Manager for e-business to provide a common single view of user access, deploy stronger authentication (including step-up/2-factor), and implement a single infrastructure for control of user sessions and logins across all enterprises applications.
Also, as your SSO needs extend beyond the enterprise to a third party or separate domain within the enterprise (newly acquired division or different line of business), then Tivoli Federated Identity Manager adds federated SSO and Web Services Security standards such as SAML, Liberty, WS-Federation, and WS-Trust support to user access control and run-time enforcement. Tivoli Federated Identity Manager is an access control solution with a run-time enforcement. Although it has identity in the product name, it is not another identity management system. Tivoli offers only one identity management system and that is IBM Tivoli Identity Manager. Tivoli Access Manager for e-business interoperates with a wide variety of IBM and non-IBM products and platforms to reduce duplication, to maximize integration, and to establish automation for Web access management.

Features

∗ **Define and manage a centralized authentication, access control policy for a broad range of business initiatives such as employee, customer, and business partner portal, CRM and ERP systems upgrades, new ECM and business intelligence platforms deployments,**

About Memory Express

Although we started out selling just Memory the best part of fifteen years ago, we have diversified organically over the years at the request of our customers. We specialise in Networking, Storage and Disaster Recovery and have the knowledge, experience and strategic partnerships to provide you with the service and value you demand - quality products, reasonably priced and delivered on time.

Memory Express can offer you a full range of installation and configuration services for hardware and software as well as detailed, accurate advice on all aspects of your IT projects. You'll be glad to know that we don't have a room full of school leavers trying to sell products they don't understand - all our staff are seasoned IT specialists and have an average length of service of over ten years. We won't just push you towards the solution we feel like selling; we'll help you to find the one you need.

Meanwhile, online, we offer one of the largest product ranges of any UK IT supplier. Showing near live stock, in depth product information and keen pricing, we're sure you'll find what you need. We also have matched memory upgrades for over 50,000 models of computer, server, printer, phone and camera, guaranteeing you the right memory, first time. All this is backed up by the same great service you'd expect when dealing with us over the phone. For our regular business customers, we provide T3, our corporate purchasing portal which provides a truly corporate focused buying experience.

We're conveniently located in Park Royal, London's Technology Business Park, allowing us to reach all areas of the UK quickly and efficiently. Many of our City based corporate clients benefit from same day delivery and we can offer next day delivery to established customers throughout the British Isles. Online delivery tracking and status information means that you need not worry about the whereabouts of your order.

We're proud to have built up a wide variety of partnerships with quality vendors and many of our staff hold certifications from top tier manufacturers including Microsoft, Acronis, Symantec and VMWare.

Our clients vary in size from SMEs to many of the UK's largest corporates, government departments, schools and universities, and we're pleased to say that most have been our customers for many, many years - we believe in long term business relationships, not turning a quick profit. Why not contact us now to see how we can help you get the quality of service they already enjoy?
