IBM Tivoli Identity Manager and Role Management User Value Unit Annual Software Maintenance Renewal

IBM **Tivoli** software

Tivoli Identity Manager helps automate the creation, modification, and termination of user privileges throughout the entire user lifecycle. Operational role management helps bridge the gap between how business users view their IT resources and the actual IT implementation of user access rights. Role hierarchy helps to simplify and reduce the cost of user administration by enabling the use of an organizational role structure. Separation of duties can strengthen security and compliance by creating, modifying, or deleting policies that exclude users from membership to multiple roles that may present a business conflict. User recertification enhancements simplify the attestation process while expanding the means to manage compliance. Recertification of a user's roles, accounts, and groups in bulk fashion enables managers to make yes/no decisions on a user's access rights in a single submission. Group management helps simplify and reduce the cost of user administration with the ability to add, remove, or change the attributes of a group within Tivoli Identity Manager. Comprehensive request-based provisioning for requesting and approving user access to roles, accounts or fine-grained access entitlements such as shared folders and Web portlets.

User Value Unit (UVU) is a unit of measure by which the program can be licensed. UVU Proofs of Entitlement (PoEs) are based on the number and type of users for the given program. Licensee must obtain sufficient entitlements for the number of UVUs required for licensee's environment as specified in the table below. The UVU entitlements are specific to the program and type of user and may not be exchanged, interchanged, or aggregated with UVU entitlements of another program or type of user. The users for the purposes of UVU calculation are the sum of all internal users, external users, and infrequent users given access to the program.

Features

- * **Annual Software Maintenance Renewal**
- * **Operational role management helps bridge the gap between how business users view their IT resources and the actual IT implementation of user access rights**
- * **Role hierarchy helps to simplify and reduce the cost of user administration by enabling the use of an organizational role structure**
- * **Separation of duties can strengthen security and compliance by creating, modifying, or deleting policies that exclude users from membership to multiple roles that may present a business conflict**
- * **Group management helps simplify and reduce the cost of user administration with the ability to add, remove, or change the attributes of a group within Tivoli Identity Manager**
- * **Comprehensive request-based provisioning for requesting and approving user access to roles, accounts or fine-grained access entitlements such as shared folders and Web portlets**
- * **Features a user interface tailored to specific types of users (auditors, managers, administrators, and more) and is highly customizable**

IBM Tivoli Identity Manager and Role Management User Value Unit Annual Software Maintenance Renewal

Specification

General

Tivoli Identity Manager helps automate the creation, modification, and termination of user privileges throughout the entire user lifecycle. Operational role management helps bridge the gap between how business users view their IT resources and the actual IT implementation of user access rights. Role hierarchy helps to simplify and reduce the cost of user administration by enabling the use of an organizational role structure. Separation of duties can strengthen security and compliance by creating, modifying, or deleting policies that exclude users from membership to multiple roles that may present a business conflict. User recertification enhancements simplify the attestation process while expanding the means to manage compliance. Recertification of a user's roles, accounts, and groups in bulk fashion enables managers to make yes/no decisions on a user's access rights in a single submission. Group management helps simplify and reduce the cost of user administration with the ability to add, remove, or change the attributes of a group within Tivoli Identity Manager. Comprehensive request-based provisioning for requesting and approving user access to roles, accounts or fine-grained access entitlements such as shared folders and Web portlets.

Information

User Value Unit (UVU) is a unit of measure by which the program can be licensed. UVU Proofs of Entitlement (PoEs) are based on the number and type of users for the given program. Licensee must obtain sufficient entitlements for the number of UVUs required for licensee's environment as specified in the table below. The UVU entitlements are specific to the program and type of user and may not be exchanged, interchanged, or aggregated with UVU entitlements of another program or type of user. The users for the purposes of UVU calculation are the sum of all internal users, external users, and infrequent users given access to the program.

About Memory Express

Although we started out selling just Memory the best part of fifteen years ago, we have diversified organically over the years at the request of our customers. We specialise in Networking, Storage and Disaster Recovery and have the knowledge, experience and strategic partnerships to provide you with the service and value you demand - quality products, reasonably priced and delivered on time.

Memory Express can offer you a full range of installation and configuration services for hardware and software as well as detailed, accurate advice on all aspects of your IT projects. You'll be glad to know that we don't have a room full of school leavers trying to sell products they don't understand - all our staff are seasoned IT specialists and have an average length of service of over ten years. We won't just push you towards the solution we feel like selling; we'll help you to find the one you need.

Meanwhile, online, we offer one of the largest product ranges of any UK IT supplier. Showing near live stock, in depth product information and keen pricing, we're sure you'll find what you need. We also have matched memory upgrades for over 50,000 models of computer, server, printer, phone and camera, guaranteeing you the right memory, first time. All this is backed up by the same great service you'd expect when dealing with us over the phone. For our regular business customers, we provide T3, our corporate purchasing portal which provides a truly corporate focused buying experience.

We're conveniently located in Park Royal, London's Technology Business Park, allowing us to reach all areas of the UK quickly and efficiently. Many of our City based corporate clients benefit from same day delivery and we can offer next day delivery to established customers throughout the British Isles. Online delivery tracking and status information means that you need not worry about the whereabouts of your order.

We're proud to have built up a wide variety of partnerships with quality vendors and many of our staff hold certifications from top tier manufacturers including Microsoft, Acronis, Symantec and VMWare.

Our clients vary in size from SMEs to many of the UK's largest corporates, government departments, schools and universities, and we're pleased to say that most have been our customers for many, many years - we believe in long term business relationships, not turning a quick profit. Why not contact us now to see how we can help you get the quality of service they already enjoy?
